

Introduction

The Templar city of Tomar will host the European Figure Skating Cup from October 31st to November 4th of this year. Located in the heart of Portugal and therefore with excellent accesses by the highways A1, A23 and A13, this city has an offer of modern infrastructures as wide as the historical and natural heritage by which it is known. The city that stands at the feet of the Convent of Christ, UNESCO world heritage of humanity, and the Mata Nacional dos Sete Montes (national forest), Tomar is where history and modernism cross, making it ideal for tourists and athletes. With a wide range of accommodation and restaurants (national and international gastronomies), it also has several sport facilities such as the stadium, pavilions, football, basketball and volleyball courts or even the Complexo Desportivo Municipal (sports complex) with indoor pool and tennis and squash courts, among others. All this within walking distance without needing transportation, you can still enjoy several parks for leisure or even for workout.
